For some WaveLab plugins, you have to install the trial version first. Different cable types are supplied with your eLicensor. If you decide to use a USB cable to connect your eLicensor to your computer, remember to connect your eLicensor to a power supply first and connect the supplied USB cable only after that. There are two options to connect your eLicensor to your computer. The easiest way to connect your eLicensor to your computer is to use a USB keyboard connected to your computer with the same port on your computer that you connect your eLicensor. Because a USB keyboard only has one USB connection, only one eLicensor will be able to use the USB connection at any one time. If you connect your USB cable to your computer as described above, make sure that you connect your eLicensor to the computer first before connecting the USB cable to your computer. As mentioned before, there are two options to connect your eLicensor to your computer. You can plug the USB cable directly into your computer's USB port and this is usually the faster option. If you are using a model with a USB hub and a Windows operating system, use the other connection to connect your eLicensor to your computer. If you don't have a compatible USB hub, consider purchasing one. Only one eLicensor can use the USB connection at any one time, so if you plug the USB cable into your computer when there are no other eLicensors connected to your computer, the USB port will be blocked by the eLicensor and you won't be able to use it. Make sure to turn off your eLicensor before unplugging the USB cable if you are connecting your eLicensor to a computer using the other connection. Connecting your eLicensor to a computer In

order to connect your eLicenser to a computer, follow these steps: Plug the USB cable supplied with your eLicenser into the eLicenser and into the USB port on your computer. Connect your computer to an external power supply and turn the power on. Make sure to turn off your eLicenser before unplugging the USB cable from your computer. Plug your USB cable from your computer to your laptop or desktop computer. Turn on your laptop or desktop computer. If your computer is connected to an external power supply, you 82157476af
